

"A RAGS-TO-FEATHER-BOAS HERO STRIKES GOLD" —PEOPLE

# THE LADY CHABLIS

THE SIZZLING LIFE STORY OF THE  
FABULOUS DRAG QUEEN FROM THE BESTSELLING  
MIDNIGHT IN THE GARDEN OF GOOD AND EVIL

WITH THEODORE BOULOUKOS

# HIDING MY CANDY

INTRODUCTION BY JOHN BERENDT

# “Strategic Institutional Maintenance” (S.I.M.)

## **The Good:**

- ▶ So hot right now
- ▶ Individual-level / psychological
- ▶ Plausible-ish

## **The Bad:**

- ▶ Nobody agrees on anything
- ▶ Impossible to measure directly

# What You're Doing

# What (I Think) You Should Be Doing

# Many Small Things

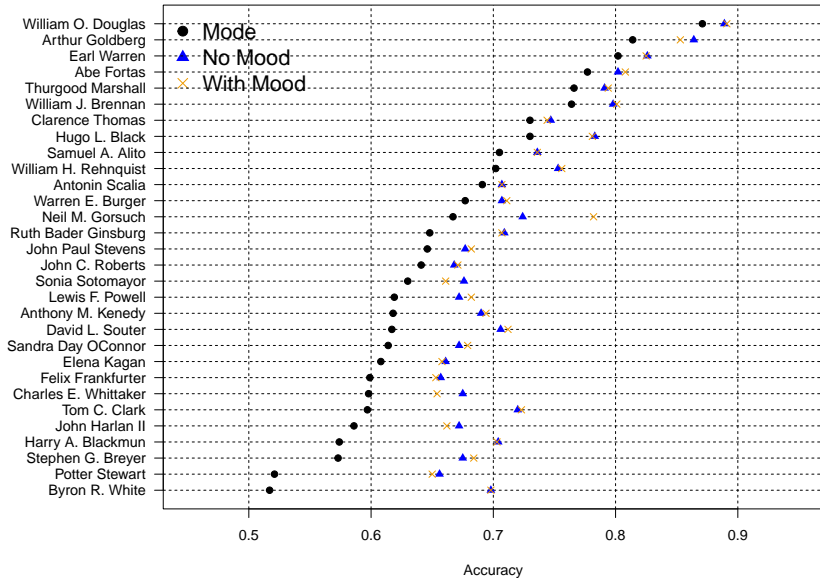

## Random forest details:

- ▶ Classification or regression?
- ▶ Node depth, etc.
- ▶ Stratify by term? → Dimension(s) of variation (in *Mood*)
- ▶ Presentation of (+ claims about) permutation tests (Figure 3.1)
- ▶ Monotonicity / “Pushing” *Mood*... ?
- ▶ Interpretation:
  - ▶ *Highlight* variable importance
  - ▶ Same with minimal depth
  - ▶ Use available tools to discuss interactions, etc. (`ranger`, `randomForestSRC`, `rfInfer`, `grf`, `rfinterval`, `randomForestExplainer`, others)

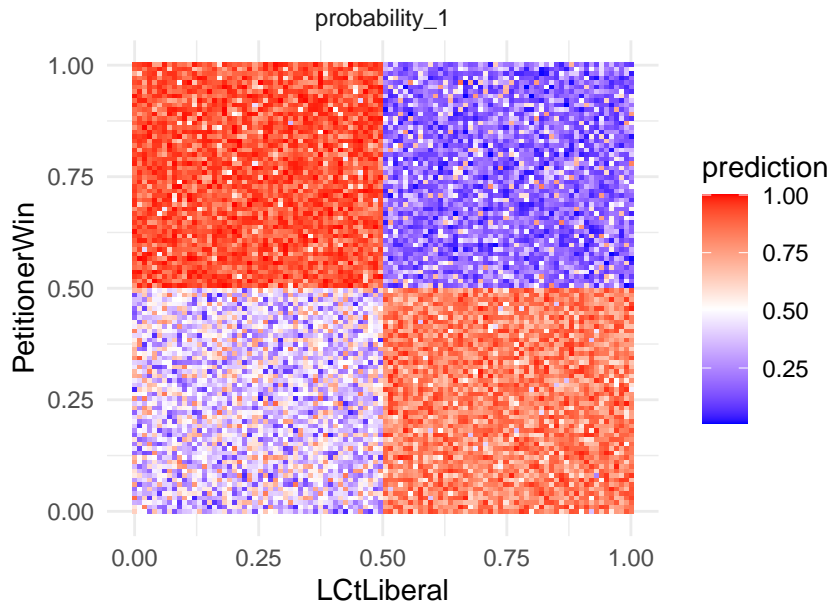

## Other things:

- ▶ Endogeneity issues:
  - ▶ Justice Ideology ↔ votes
  - ▶ Other predictors (e.g. decision type, amici, etc.)
- ▶ Issue-specific public opinion?
- ▶ Opinion text?

# A Better Table 3.1

# Interactions in Random Forests

# More Generally: What's Going On

Micro  $\longrightarrow$  Macro

## Project Organization

Chapter	Level	Theory	Outcome	Predictor	Method
Three	Individual	S.I.M.	Vote	<i>Mood</i>	RFs
Five	Justice-Year	"Drift"	Vote %	<i>Mood</i>	VAR
Six	Court-Year	Personnel Change	Decision %	<i>Mood</i>	VAR
